The fifth displayed formula on p. 45 should read

$$\exp(t\mathbf{v}_2) \exp(s\mathbf{v}_1)(r_0, \frac{5}{4}\pi) = \exp(t\mathbf{v}_2)(r_0, \frac{7}{4}\pi) = (r_0, \frac{9}{4}\pi).$$

i.e., change the second and third angles from  $\frac{5}{4}\pi$  to  $\frac{7}{4}\pi$  and  $\frac{9}{4}\pi$ , respectively.
