**When is the homework due?**

Written homework is to be turned into your TA during Tuesday’s discussion session. If homework is to be late for any reason, you must make arrangements with your TA *as soon as possible*. It is up to his or her discretion whether to accept late homeworks.

WebWork, the online homework, is due by 5:00 AM Friday mornings. No extensions will be given!

**How do I log onto Webwork?**

To log on to the web based homework, go to:

http://roy.math.umn.edu/webwork2

Click on Math 1031 Fall 2012

Your login is your x500 UMN email ID and your password is your student ID. For example, if your email address is jdoe999@umn.edu, then:

Login: jdoe

ID: 1234567

Remember, the web based homework must be completed by Friday at 5:00 am!

**What calculator do you recommend?**

TI-30X IIS 2-Line Scientific Calculator

**I’m sick, and it’s exam day! What should I do?**

Make-up midterm exams will be given to students with legitimate excuses such as a doctor verified illness. The doctor must verify that you are too ill to take the exam, not just that you showed up for an appointment. You must make arrangements with Ms. Nash *before* the midterm- send an email to jnash@umn.edu as soon as possible.

**I need special exam accomodations due to a disability, e.g. longer testing time, quiet testing environment, etc. How do I set this up?**

Disability Services (Suite 230, McNamara Alumni Center or http://ds.umn.edu) is solely responsible for all special exam accomodations. They need at least one weeks notice. Neither Ms. Nash nor the Math dept. can proctor exams outside of regular class time.

**I’m struggling with the course. Where can I get more help?**

The Discussion, PAL class, and office hours are the primary places to get help. I strongly encourage you to attend all classes, and if you are the least bit confused, get help quickly!

The SMART Learning Commons is the only source for extra (free) tutorial help. They will be offering small group and pre-exam workshops starting Monday, Sept 12, 2011. For further information, go to: smart.umn.edu

The Math department has a list of highly qualified tutors for hire.
