

BONUS HOMEWORK (DUE: MAY 6, MON)

Please read and follow the instructions below:

- You may redo one of the problem sets in this course. If your new score is higher than the previous one, then the previous one will be replaced by the new one. Otherwise, the previous one will be kept as is.
- Grading will be more strict for this homework than the usual. It is expected that there is no logical flaw or significant gap on the answers.
- You may not just copy and paste the solutions posted on the website. If the answer is merely repetition of the solutions and it does not show proper understanding on the subject, then no score will be given.
- No late submission will be accepted.
