In the displayed formula between (5.8) and (5.9), the sum should go from  $j = 1, \dots, p + q$ , as should the indices on the  $P_j$ :

$$\widehat{P}(t, T) = \sum_{j=1}^{p+q} t_j P_j(t, T), \quad \text{for some } P_1, \dots, P_{p+q} \in \mathcal{T}^k.$$
