

Svitlana Mayboroda

School of Mathematics
University of Minnesota
127 Vincent Hall
206 Church St. SE.
Minneapolis, MN 55455

Phone: 1-612-624-4001

email: svitlana@math.umn.edu

URL: <http://www.math.umn.edu/~svitlana>

Born: June 2, 1981 – Kharkiv, Ukraine

Academic Degrees:

- 2005 **PhD** degree in Mathematics, University of Missouri at Columbia, USA, May 2005. Thesis advisor Professor Marius Mitrea. Thesis title “The Poisson Problem in Lipschitz Domains”.
- 2001 Full Higher Education in the specialty Applied Mathematics (equivalent to **MS**), Kharkiv National University, Ukraine, June 2001.
- 2001 Full Higher Education in the specialty Finance (equivalent to **MBA**), KISP, Ukraine, September 2001.

Academic Positions:

- 2016– Northrop Professor, University of Minnesota, USA
- 2015– Full Professor, University of Minnesota, USA
- 2011–2015 Associate Professor, University of Minnesota, USA
- 2008–2011 Assistant Professor (promoted to Associate Professor from August 2011), Purdue University, USA
- 2007 Visiting Assistant Professor, Brown University, USA
- 2006–2008 Zassenhaus Visiting Assistant Professor, The Ohio State University, USA
- 2005 Visiting Assistant Professor, Australian National University, Australia

Research Interests:

PARTIAL DIFFERENTIAL EQUATIONS:

second and higher order elliptic differential equations and systems in non-smooth media, boundary value problems, regularity, potential theory, spectral theory, wave propagation and localization of the eigenmodes in rough domains, free boundary problems, harmonic/elliptic measure.

ANALYSIS:

harmonic analysis, singular integral operators, maximal functions, function spaces, wavelet and atomic decompositions, interpolation, functional calculus of differential operators, operator theory.

GEOMETRIC MEASURE THEORY:

geometry of rough domains, non-linear capacity, rectifiability, Analysis and PDEs on uniformly rectifiable sets, harmonic measure, regularity of free boundaries.

PHYSICS:

influence of rough geometry and/or material on properties of a physical system, localization of waves in acoustics, plate vibration, Anderson localization, quantum physics, systems of cold atoms.

ENGINEERING:

analysis and design of GaN light emitting devices, the impact of disorder in nitride alloy materials on localization of carriers in quantum wells, radiative efficiency, Auger recombination, quantum droop, on performance of LEDs and lasers.

Current membership in professional organizations:

American Mathematical Society
Association for Women in Mathematics

Grants, awards, and honors:

2018 speaker at the ICM 2018
2017 Von Neumann Fellowship, IAS, 2018
2017 Simons Foundation, Simons Fellowship in Mathematical Sciences, PI, 2017–2018, \$110,000
2016 Northrop Professor, University of Minnesota
2016 Ecole Polytechnique, 2016, chercheur invité, 3 months
2016 NSF, The Nineteenth Rivière-Fabes Symposium, PI, 2016
2015 Fellow of the American Mathematical Society
2015 NSF, The Eighteenth Rivière-Fabes Symposium, co-PI, 2015
2015 Fondation Jacques Hadamard Fellowship, 2015
2014 AWM-Sadosky Prize in Analysis, 2014
2014 Integrated NSF Support Promoting Interdisciplinary Research and Education (INSPIRE) Award, 2014–2019, \$800,000.00, “*INSPIRE Track 1: Localization: analysis, control, and design of waves in inhomogeneous media.*”
2014 NSF, The Seventeenth Rivière-Fabes Symposium, co-PI, 2014.
2013 Ecole Polytechnique, 2013, chercheur invité, 2 months
2011 NSF Faculty Early Career Development (CAREER) Award, 2011–2016, \$410,000.00, *CAREER: Analysis of Partial Differential Equations in non-smooth media*,
2013 CNRS, Projets Exploratoires Pluridisciplinaires (PEPS 2013), Physique Théorique et ses Interfaces, “*Théorie géométrico-analytique de la localisation*”, collaborator, 2013.
2013 NSF DMS 1304998, The Sixteenth Rivière-Fabes Symposium, co-PI, 2013.
2012 CNRS, 2012, chercheur invité, 3 mois
2012 CNRS, Projets Exploratoires Pluridisciplinaires (PEPS 2012), Physique Théorique et ses Interfaces, “*Théorie géométrique de la localisation*”, collaborator, 2012.
2012 NSF MRSEC (Materials Research Science and Engineering Center) Seed, MRSEC III Award DMR 0819885, 2011-2014. The project was chosen for NSF MRSEC Seed highlights in 2012.
2010 Alfred P. Sloan Research Fellowship, 2010–2015, \$50,000.00.
2010 Farman Project, ENS Cachan, France, collaborator, January-December 2010.

- 2008 NSF Grant DMS 0758500 (individual disciplinary grant, Analysis program), 2008–2011, *Elliptic Boundary Value Problems, Harmonic Analysis and Spectral Theory*,
- 2007 The Association for Women in Mathematics, Travel Grant, Summer 2007.
- 2001 Degree with Honors, Kharkiv National University, Ukraine, June 2001.
- 1997 Honors Fellowship, Kharkiv National University, Ukraine, September 1997- June 1999.

Currently active funding:

- 2017 Von Neumann Fellowship, IAS, 2018
- 2017 Simons Foundation, Simons Fellowship in Mathematical Sciences, PI, 2017–2018, \$110,000
- 2014–2019 Integrated NSF Support Promoting Interdisciplinary Research and Education (INSPIRE) Award, PI, 2014–2019, \$800,000.00, “INSPIRE Track 1:” *Localization: analysis, control, and design of waves in inhomogeneous media*.
- 2011–2016 NSF Faculty Early Career Development (CAREER) Award, PI, 2011–2016, \$410,000.00, *CAREER: Analysis of Partial Differential Equations in non-smooth media*,

Publications

9 MOST IMPORTANT PUBLICATIONS:

- 2017 *Polyharmonic capacity and Wiener test of higher order* (with Vladimir Maz’ya), *Inventiones Mathematicae*, accepted.
- 2014 *Regularity of solutions to the polyharmonic equation in general domains* (with Vladimir Maz’ya), *Inventiones Mathematicae*, 196 (2014), no. 1, 1–68.
<http://dx.doi.org/10.1007/s00222-013-0464-1>.
- 2012 *Universal mechanism for Anderson and weak localization* (with Marcel Filoche), *Proceedings of the National Academy of Sciences*, 2012 109 (37) 14761–14766; published ahead of print August 27, 2012, doi:10.1073/pnas.1120432109
- 2009 *Boundedness of the gradient of a solution and Wiener test of order one for the biharmonic equation* (with Vladimir Maz’ya), *Inventiones Mathematicae*, 175 (2009), no. 2, 287–334.
- 2015 *Square function/non-tangential maximal function estimates and the Dirichlet problem for non-symmetric elliptic operators* (with Steve Hofmann, Carlos Kenig, and Jill Pipher), *Journal of the American Mathematical Society*, 28 (2015), no. 2, 483–529.
- 2016 *The effective confining potential of quantum states in disordered media* (with Doug Arnold, Guy David, Marcel Filoche, and David Jerison), *Physical Review Letters*, 116 (2016), 056602.
- 2016 *Rectifiability of harmonic measure* (with Jonas Azzam, Steve Hofmann, José María Martell, Mihalis Mourgoglou, Xavier Tolsa, and Alexander Volberg), *Geometric and Functional Analysis (GAFA)*, accepted DOI: 10.1007/s00039-016-0371-x
- 2015 *Uniform Rectifiability, Carleson measure estimates, and approximation of harmonic functions*, (with Steve Hofmann and Jose Maria Martell), *Duke Math. J.*, accepted.
- 2016 *One single static measurement predicts wave localization in complex structures* (with Gautier Lefebvre, Alexane Gondel, Marc Dubois, Michael Atlan, Florian Feppon, Aimé Labbé, Camille Gillot, Alix Garelli, Maxence Ernout, Marcel Filoche, Patrick Sebbah), *Physical Review Letters*, accepted.

SUBMITTED:

- 2017 *Localization of eigenfunctions via an effective potential* (with Douglas Arnold, Guy David, Marcel Filoche, David Jerison), submitted.
- 2017 *Computing spectra without solving eigenvalue problems* (with Douglas Arnold, Guy David, Marcel Filoche, David Jerison), submitted.

- 2017 *Uniform rectifiability and elliptic operators with small Carleson norm* (with Steve Hofmann, José María Martell, Tatiana Toro, Zihui Zhao), submitted, arXiv:1710.06157
- 2017 *Dahlberg's theorem in higher co-dimension* (with Guy David and Joseph Feneuil), submitted.
- 2017 *Dirichlet and Neumann boundary values of solutions to higher order elliptic equations* (with Ariel Barton and Steve Hofmann), submitted.
- 2017 *Bounds on layer potentials with rough inputs for higher order elliptic equations* (with Ariel Barton and Steve Hofmann), submitted.
- 2017 *Elliptic theory for sets with higher co-dimensional boundaries* (with Guy David and Joseph Feneuil), submitted.
- 2016 *Absolute continuity between the surface measure and harmonic measure implies rectifiability*, (with Steve Hofmann, José María Martell, Xavier Tolsa and Alexander Volberg), ArXiv

PUBLISHED AND IN PRESS:

- 2017 *Fundamental Matrices and Green Matrices for non-homogeneous elliptic systems* (with Blair Davey and Jonathan Hill), Publicacions Matemàtiques, accepted.
- 2017 *The Neumann problem for higher order elliptic equations with symmetric coefficients* (with Ariel Barton and Steve Hofmann), Math. Ann., accepted.
- 2017 *Polyharmonic capacity and Wiener test of higher order* (with Vladimir Maz'ya), Inventiones Mathematicae, accepted.
- 2016 *Localization landscape theory of disorder in semiconductors III: Application to carrier transport and recombination in light emitting diodes*, (with Chi-Kang Li, Marco Piccardo, Li-Shuo Lu, Lucio Martinelli, Jacques Peretti, James S. Speck, Claude Weisbuch, Marcel Filoche, Yuh-Renn Wu), Phys. Rev. B, accepted.
- 2016 *Localization landscape theory of disorder in semiconductors I: Theory and modeling* (with Marcel Filoche, Marco Piccardo, Yuh-Renn Wu, Chi-Kang Li, Claude Weisbuch), Phys. Rev. B, accepted.
- 2017 *A free boundary problem for the localization of eigenfunctions* (with Guy David, Marcel Filoche, David Jerison), a monograph, Astérisque, accepted.
- 2017 *Square function estimates on layer potentials for higher-order elliptic equations* (with Ariel Barton and Steve Hofmann), Mathematische Nachrichten, accepted.
- 2017 *Local Hardy spaces associated with inhomogeneous higher order elliptic operators* (with Dachun Yang and Jun Cao), Anal. Appl. (Singap.) 15 (2017), no. 2, 137–224.
- 2016 *Localization of eigenfunctions*, Notices of the AMS, accepted.
- 2016 *One single static measurement predicts wave localization in complex structures* (with Gautier Lefebvre, Alexane Gondel, Marc Dubois, Michael Atlan, Florian Feppon, Aimé Labbé, Camille Gillot, Alix Garelli, Maxence Ernout, Marcel Filoche, Patrick Sebbah), Physical Review Letters, accepted.
- 2016 *Higher-order elliptic equations in non-smooth domains: some old and new results* (with Ariel Barton), Harmonic Analysis, Partial Differential Equations, Complex Analysis, Banach Spaces, and Operator Theory. Celebrating Cora Sadosky's life. Volume 1.
- 2016 *Rectifiability of harmonic measure* (with Jonas Azzam, Steve Hofmann, José María Martell, Mihalis Mourgoglou, Xavier Tolsa, and Alexander Volberg), Geom. Funct. Anal. 26 (2016), no. 3, 703–728. DOI: 10.1007/s00039-016-0371-x
- 2016 *Harmonic measure is rectifiable if it is absolutely continuous with respect to the co-dimension one Hausdorff measure* (with Jonas Azzam, Steve Hofmann, José María Martell, Mihalis Mourgoglou, Xavier Tolsa, and Alexander Volberg), C. R. Math. Acad. Sci. Paris 354 (2016), no. 4, 351–355.
- 2016 *The effective confining potential of quantum states in disordered media* (with Doug Arnold, Guy David, Marcel Filoche, and David Jerison), Physical Review Letters, 116 (2016), 056602.
- 2016 *Layer potentials and boundary-value problems for second order elliptic operators with data in Besov spaces* (with Ariel Barton), Mem. Amer. Math. Soc. 243 (2016), no. 1149, v+110 pp.
- 2016 *Uniform Rectifiability, Carleson measure estimates, and approximation of harmonic functions*, (with Steve Hofmann and Jose Maria Martell), Duke Math. J. 165 (2016), no. 12, 2331–2389.

- 2016 *Maximal function characterizations of Hardy spaces associated to homogeneous higher order elliptic operators* (with Dachun Yang and Jun Cao), *Forum Math.* 28 (2016), no. 5, 823–856.
- 2015 *Dual hidden landscapes in Anderson localization on discrete lattices* (with Marcel Filoche, Marcelo Lyra), *Europhys. Lett. EPL*, Volume 109, Number 4, *Editor's choice*.
- 2015 *L^p and endpoint solvability results for divergence form elliptic equations with complex L^∞ coefficients* (with Steve Hofmann and Mihalis Mourgoglou), *Advances in Mathematics*, 270 (2015), 480–564.
- 2015 *The Regularity problem for second order elliptic operators with real non-symmetric coefficients* (with Steve Hofmann, Carlos Kenig, and Jill Pipher), *Mathematische Annalen*, 361 (2015), no. 3-4, 863–907.
- 2015 *Square function/non-tangential maximal function estimates and the Dirichlet problem for non-symmetric elliptic operators* (with Steve Hofmann, Carlos Kenig, and Jill Pipher), *Journal of the American Mathematical Society*, 28 (2015), no. 2, 483–529.

- 2008 *Boundedness of the Hessian of a biharmonic function in a convex domain* (with Vladimir Maz'ya), *Comm. Partial Differential Equations* 33 (2008), no. 7–9, 1439–1454.
- 2007 *Interpolation of Hardy-Sobolev-Besov-Triebel-Lizorkin spaces and applications to problems in partial differential equations* (with Nigel Kalton and Marius Mitrea), *Interpolation Theory and Applications, Contemporary Mathematics*, 445 (2007), 121–177.
- 2007 *The solution of the Chang-Krantz-Stein conjecture* (with Marius Mitrea), to appear in *Proceedings of the Workshop in Harmonic Analysis, Tokyo, Japan*.
- 2006 *The Poisson problem for the Lamé system on low-dimensional Lipschitz domains* (with Marius Mitrea), *Integral methods in science and engineering*, 137–160, Birkhauser Boston, Boston, MA, 2006.
- 2006 *Layer potentials and boundary value problems for Laplacian in Lipschitz domains with data in quasi-Banach Besov spaces* (with Marius Mitrea), *Annali di Matematica Pura ed Applicata* (4) 185 (2006), no. 2, 155–187.
- 2004 *Sharp estimates for Green potentials on non-smooth domains* (with Marius Mitrea), *Mathematical Research Letters*, 11 (2004), 481–492.
- 2004 *Square-function estimates for singular integrals and applications to partial differential equations* (with Marius Mitrea), *Differential Integral Equations*, 17 (2004), no. 7–8, 873–892.
- 2001 *On one approach to the solution of problems of numerical analysis of the electrostatic field*, *Collection of the scientific works of KISP, V. 6* (2001), 223–227.

Students and postdoctoral researchers

GRADUATE:

- 2015–present Bruno Poggi, University of Minnesota, is a graduate student at the University of Minnesota. He is working on sharp exponential decay estimates for the heat kernel and fundamental solution for the generalized Schrödinger operator under the supervision of Svitlana Mayboroda.
- 2013–present Jonathan Hill, University of Minnesota, is working on the properties of the Green function for elliptic operators with bounded measurable coefficients. He has showed that in the case of an elliptic operator with t -independent coefficients the Green potential exhibits appropriate mapping properties in weak- L^p spaces (and this is sharp) and is moving towards considering more general operators and systems. In particular, he is working with Blair Davey on well-posedness of boundary problems for generalized Schrödinger operator. Jonathan and Blair have already proved the basic estimates of fundamental solutions, Green function, and Neumann Green function.
- 2015–2016 Eli Johnson, University of Minnesota, has worked on the boundary regularity for fractional Laplacian under the supervision of Svitlana Mayboroda. He is currently moving to graduate school at the University of Washington.
- 2009–2014 Koushik Ramachandran, Purdue University, graduated in May 2014. Koushik was working on asymptotics of harmonic functions in rough paraboloid-shaped domains (supervised by Svitlana Mayboroda jointly with Alexandre Eremenko). He has published the results of his dissertation and has moved on to a postdoctoral position at the Indian Statistical Institute (ISI) at Bangalore, India.

POSTDOCTORAL:

- 2016–present

Simon Bortz, University of Minnesota. Simon Bortz has graduated from the University of Missouri, under the supervision of Steve Hofmann, in the Spring of 2016. He has joined the University of Minnesota from the Fall of 2016, to work on the project partially funded by the NSF INSPIRE grant (see above). Specifically, Simon is working on Dirichlet, Neumann, and regularity problems in higher co-dimension, as well as layer potentials for the generalized Schrödinger operator.

2016–present Robert Viator, University of Minnesota and IMA. Robert Viator is a postdoctoral research at the Institute for Mathematics and Applications. He has graduated from Louisiana State University under the supervision of Robert Lipton and, in addition to his duties at the IMA, is working on the localization landscape approach to Weyl law in periodic structures, under the supervision of Svitlana Mayboroda.

2015–present Joseph Feneuil, University of Minnesota.

Joseph Feneuil has graduated from the University of Grenoble, under the supervision of Emmanuel Russ. He has joined the University of Minnesota as a Dunham Jackson postdoctoral researcher in the Fall of 2015 and is working under the supervision of Svitlana Mayboroda on analogues of harmonic measure in higher co-dimension.

2014–2015 Stephen Lewis, University of Minnesota, September 2014 – January 2015.

Stephen Lewis has obtained his PhD from the University of Washington in 2014, under the supervision of Tatiana Toro, and has started working under the supervision of Svitlana Mayboroda and Douglas Arnold on localization of waves. He has left University of Minnesota in 2015 to work in industry.

2013–2015 Blair Davey, University of Minnesota, 2013–2015 Blair has obtained her PhD degree from the University of Chicago with Carlos Kenig. She has started working with Vladimir Sverak on unique continuation for elliptic and parabolic equations and with Svitlana Mayboroda on boundary value problems for Schrödinger-type elliptic operators. In this direction, Blair (together with S. Mayboroda's graduate student, Jonathan Hill) has established pointwise bounds and regularity for fundamental solutions of general elliptic PDEs of Schrödinger type with bounded measurable coefficients, obtained the corresponding results for the Green function, and is currently working on the properties of the corresponding layer potentials. Blair has secured a tenure-track position at the CUNY, starting in the Fall of 2015.

2010–2013 Ariel Barton, Purdue University and University of Minnesota, 2010–2013.

Ariel has obtained her PhD degree from the University of Chicago under the supervision of Carlos Kenig, and was working on the higher order elliptic problems on Lipschitz domains and second order problems with rough coefficients (mentored by Svitlana Mayboroda). During her postdoctoral studies, Ariel has finished 5 research papers, 3 of them jointly with Svitlana Mayboroda, 1 expository (see the list of publications above), and 1 monograph, jointly with Svitlana Mayboroda, accepted to *Memoirs of the AMS*. Ariel then held a position at the University of Missouri. She continued working on the higher order elliptic operators, specifically, well-posedness problems for divergence form elliptic PDEs with bounded measurable coefficients, under the supervision of Steve Hofmann and Svitlana Mayboroda. During this time, she has finished 1 paper on boundedness of layer potentials for higher order PDEs (joint with S. Mayboroda and S. Hofmann), an expository paper on recent developments in higher order elliptic theory (joint with S. Mayboroda) and the work on the fundamental solutions in this context (by herself). She has accepted a tenure-track position at the University of Arkansas, Fayetteville.

UNDERGRADUATE RESEARCH:

2016–present Joseph Pate, University of Minnesota is working under the supervision of Svitlana Mayboroda on the properties of the landscape function for the Neumann problem, in concert with the localization of Neumann eigenfunctions. He has received the UROP (Undergraduate Research Opportunities Program) award and is supported in part by the REU project within S. Mayboroda's CAREER grant.

- 2016–present Levi Walls, University of Minnesota is studying boundary value problems for elliptic equations, spectral theory, and spherical harmonics.
- 2013 Ye Wang, University of Minnesota, 2013 has successfully completed a UROP (Undergraduate Research Opportunities Program) project on Localization of vibrations and conformal mappings. He has started as a graduate student at the NYU from the Fall of 2013.
- 2012 Yaowen Gu, University of Minnesota, 2012 has successfully completed a Senior Project on the Harmonic measure and Brownian motion.
- 2010–2011 Brandon Patterson, Purdue University, 2010–2011, has been working on localization of vibrations in non-homogeneous strings (supervised by Svitlana Mayboroda). The project resulted in a research paper (see Refereed Publications above). Brandon has presented our joint work at the CSESC conference (<http://csesc.purdue-siam.org/>) and won the Best Undergraduate Presentation Award. He is currently a graduate student at the University of Michigan, Ann Arbor.
- 2011 Landon Lehman, Purdue University, 2011 has been working on the study of dependence of Anderson localization on the characteristics of disorder (supervised by Svitlana Mayboroda and Ariel Barton). The resulting Report can be found on S. Mayboroda’s website, at Landon is now a graduate student at the University of Notre Dame.

Service and other synergistic activities:

- 2012, 2013, 2014, 2016, 2017 **Served on an NSF panel (2012, 2013, 2014, 2016, 2017)**
- 2017 Simons foundation Collaboration Grants Program reviewer

CONFERENCES AND WORKSHOPS ORGANIZED:

- 2018 PCMI Summer School on Harmonic Analysis (with Carlos Kenig, Fanghua Lin, Tatiana Toro), July 2018
- 2018 Trimester on Harmonic Analysis (with Simon Bortz and Jose-Maria Martell), May 2018
- 2017 MSRI program on Harmonic Analysis (with Michael Christ, Allan Greenleaf, Steven Hofmann, Michael Lacey, Betsy Stovall, Brian Street), January 17–May 26, 2017
- 2016 The Nineteenth Rivière-Fabes Symposium (lead organizer), University of Minnesota, April 15–17, 2016
- 2015 AIM SQuaRE program (with A. Barton, S. Hofmann, C. Kenig, and J. Pipher), American Institute of Mathematics, Palo Alto, CA, August 31–Sept 4, 2015.
- 2015 Institut Henri Poincaré, Research in Paris (with S. Hofmann, J.-M. Martell, X. Tolsa, A. Volberg), 15 June –15 July, 2015
- 2012–2016 Workshop for Women in Analysis and PDE, yearly in the Spring/Summer of 2012–2016
2012 edition: May 30–June 2, 2012, at the Institute for Mathematics and its Applications, Minneapolis, MN, 47 participants,
<http://www.ima.umn.edu/2011-2012/SW5.30-6.2.12/>
2015 edition: May 22–25, 2015, at the Institute for Mathematics and its Applications, Minneapolis, MN
<http://www.ima.umn.edu/2014-2015/SW5.28-31.15/>
2016 edition: October 28–30, 2016, as a Special Session in the AMS Fall Central Sectional Meeting # 1123
http://www.ams.org/meetings/sectional/2239_program_ss24.html
- 2015 Banff Research Station, Research in Teams, Localization of eigenfunctions of elliptic operators (with D. Arnold, G. David, M. Filoche, D. Jerison), April 2015
- 2015 The Eighteenth Rivière-Fabes Symposium & Spring 2015 Midwest PDE Conference, University of Minnesota, April 17–19, 2015

- 2014 The Seventeenth Rivière-Fabes Symposium, University of Minnesota, April 25–27, 2014
- 2014 AIM SQuaRE program (with A. Barton, S. Hofmann, and J. Pipher), American Institute of Mathematics, Palo Alto, CA, April 21–25, 2014.
- 2013 The Sixteenth Rivière-Fabes Symposium, University of Minnesota, April 19–21, 2013
- 2012 AIM SQuaRE program (with S. Hofmann, C. Kenig and J. Pipher), American Institute of Mathematics, Palo Alto, CA, August 27–31, 2012.
- 2011 Workshop “Weighted singular integral operators and Non-Homogeneous Harmonic Analysis” (with A. Volberg and M. Reguera), American Institute of Mathematics, Palo Alto, CA, tentatively October 10–14, 2011.
- 2011 Special Session on Harmonic Analysis and Partial Differential Equations at Joint Mathematics Meetings #1067 (with T. Toro), New Orleans, LA, January 6–9, 2011.
- 2010 Special Session on Harmonic Analysis at the 2010 Fall Eastern Sectional Meeting #1062 (with D. Bilyk), October 2–3, 2010, Syracuse University, Syracuse, NY.
- 2010 Research in Teams, Banff International Research Station, “Boundary problems for the second order elliptic equations with rough coefficients” (with S. Hofmann, C. Kenig and J. Pipher), April 18–25, 2010.

EDITORIAL WORK:

- 2015–present Editor for the Proceedings of the American Mathematical Society
- 2017–present Editor for the Potential Analysis

REFEREEING:

a non-complete list, with (randomly) selected papers identified by years:
 Inventiones Mathematicae; Duke Math Journal (2013, 2016); Advances in Mathematics (2012, 2011); Journal of Functional Analysis (3 papers); Advances in Differential Equations (2013); Mathematical Research Letters (2011); Communications on PDE (2016); Transactions of the American Mathematical Society (5 papers, 2014, 2012, 2011, and before); Proceedings of London Mathematical Society (2 papers, 2012 and before); Publicacions Matemàtiques (2012); Communications on Pure and Applied Analysis (2014); Potential Analysis (2012); Journal of Mathematical Analysis and Applications (3 papers); Advanced Nonlinear Studies; Revista Matemática Iberoamericana; Central European Journal of Mathematics; Electronic Journal of Differential Equations; Quarterly of Applied Mathematics; Discrete and Continuous Dynamical Systems - Series S; Journal of Inequalities and Applications; Advances in Acoustics and Vibration

SERVICE TO THE UNIVERSITY AND THE DEPARTMENT:

- 2016–2017 College of Science & Engineering Consultative Committee; Awards Committee
- 2015–2016 College of Science & Engineering Dean Search Committee; College of Science & Engineering Consultative Committee, Faculty Search Committee; Rivière-Fabes Symposium organizing committee; Visitor Program Committee
- 2014–2015 Dunham Jackson Postdoc Search Committee; Rivière-Fabes Symposium organizing committee; Ordway Visitor Committee
- 2013–2014 Faculty Search Committee; Rivière-Fabes Symposium organizing committee; Visitor Program Committee
- 2012–2013 Graduate Studies Committee; Rivière-Fabes Symposium organizing committee; Ordway Visitor Committee

SUPPORTING THE GROUPS UNDERREPRESENTED IN MATHEMATICS:

- 2012–2016

- organizer of the Workshop for Women in Analysis and PDE (see above)
- 2012–present faculty supervisor of the University group for Undergraduate Women in Mathematics, University of Minnesota
- 2012–present faculty supervisor of the AWM Chapter at the University of Minnesota
- 2011 in the Association for Women in Mathematics Mentor Network (mentored Dina Buric)

INTERDISCIPLINARY WORK:

physics (with M. Filoche, Ecole Polytechnique, D. Arnold, University of Minnesota, G. David, Université Paris Sud – Orsay, D. Jersion, MIT, V. Josse, Institut d’Optique, and others)

engineering (with J. Speck, University of California – Santa Barbara and C. Weisbuch, Ecole Polytechnique & University of California – Santa Barbara, P. Sebbah, Institut Langevin, and others)

This work has been supported by the NSF INSPIRE grant and the NSF MRSEC UMN grant. It resulted in 4 publications, in Physical Review Letters, Proceedings of the National Academy of Sciences, and Contemporary Mathematics (see Publications section), 1 is submitted, and 2 more are to be submitted within 2-3 months. It addresses wave localization in acoustics, plate vibration, quantum physics, and its role in LED engineering.

Teaching Experience

- 2015 *Elementary Partial Differential Equations*, undergraduate, Fall 2015, University of Minnesota.
- 2014 *Real Analysis*, graduate, Fall 2014, University of Minnesota.
- 2014 *Theory of Partial Differential Equations – II*, graduate, Spring 2014, University of Minnesota.
- 2013 *Linear Algebra and Differential Equations*, undergraduate, Spring 2013, University of Minnesota.
- 2011 *Elementary Partial Differential Equations*, undergraduate, Fall 2011, University of Minnesota.
- 2011 *Introduction to Distributions*, graduate, reading course, Summer 2011, Purdue University.
- 2011 *Partial Differential Equations*, graduate, Spring 2011, Purdue University.
- 2010 *Localization of vibrations*, graduate, reading course, Spring and Fall 2010, Purdue University.
- 2009 *Ordinary Differential Equations*, undergraduate, Fall 2009, Fall 2010, Purdue University (2 sections each).
- 2008 *Differential Equations and Partial Differential Equations for Engineering and the Sciences*, undergraduate, Fall 2008, Purdue University.
- 2008 *Accelerated Calculus with Analytic Geometry II*, undergraduate, Winter 2008, the Ohio State University.
- 2007 *Multivariable Calculus*, undergraduate, Fall 2007, Brown University.
- 2006–2008 *Introduction to Real Analysis* (various levels, undergraduate/graduate), Fall 2006, Winter 2007, Spring 2007, Spring 2008, the Ohio State University.
- 2004, 2006 *Analytic Geometry and Calculus I*, undergraduate, Fall 2004, University of Missouri-Columbia, Winter 2006, The Ohio State University.
- 2003 *Calculus II*, undergraduate, Fall 2003, University of Missouri-Columbia
- 2003–2005 *Elements of Calculus*, undergraduate, Winter 2003, Winter 2004, Winter 2005, University of Missouri-Columbia
- 2002 *College Algebra for Calculus Bound Students*, undergraduate, Fall 2002, University of Missouri-Columbia

Invited Talks

- 2018 International Congress of Mathematicians, Rio de Janeiro, Brazil, August 2018
- 2017 Harmonic measure and rectifiability, Principal Lecturer, Prairie Analysis Seminar, Kansas State

- University, Manhattan, Kansas, September 2017
- 2017 Localization of eigenfunctions, Recent Developments In Harmonic Analysis, MSRI, Berkeley, CA, May 2017
- 2017 Localization of eigenfunctions, Geometry, Analysis and Probability, in honor of Peter Jones, KIAS, Seoul, Korea, May 2017
- 2017 Harmonic measure in higher co-dimension, Colloquium, University of California, Irvine, April 2017
- 2017 The hidden landscape of localization of eigenfunctions, Math Physics seminar, University of California, Irvine, April 2017
- 2017 The hidden landscape of localization of eigenfunctions, plenary talk at the AWM Research Symposium 2017, April 2017
- 2017 Harmonic measure in higher co-dimension, Analysis seminar, UCLA, April 2017
- 2017 Localization of eigenfunctions, Indiana University, Bloomington, February 2017
- 2017 Scale-invariant estimates in Analysis, PDEs, and geometry, lecture series, Introductory Workshop, MSRI, January 2017
- 2016 Barcelona Analysis Conference 2016, Barcelona, Spain, September 2016
- 2016 Harmonic Analysis at its Boundaries, Nantes, France, June 2016
- 2016 10th International Conference on Harmonic Analysis and Partial Differential Equations, El Escorial, Madrid (Spain), June 2016
- 2016 Conference in Harmonic Analysis in Honor of Michael Christ, Madison, Wisconsin, May 2016
- 2016 Workshop on function spaces and high-dimensional approximation, CRM, Barcelona, May 2016
- 2016 Analysis Seminar, Institute for Advanced Study, February 2016
- 2016 Analysis Seminar, MIT, February 2016
- 2016 Analysis Seminar, Institute for Advanced Study, February 2016
- 2015 Analysis Seminar, Princeton University, November 2015
- 2015 Brandeis-Harvard-MIT-Northeastern Joint Mathematics Colloquium, October 2015
- 2015 Institut Henri Poincaré, Problèmes Spectraux en Physique Mathématique, June 2015
- 2015 Complex Analysis & Dynamical Systems VII, Naharia, Israel, May 2015
- 2015 Colloquium, Stanford University, April 2015
- 2015 Columbia University, April 2015
- 2015 Banff International Research Station, Workshop “Laplacians and Heat Kernels: Theory and Applications”, March 2015
- 2015 Workshop on Harmonic Analysis, Partial Differential Equations and Geometric Measure Theory, ICMAT, Campus de Cantoblanco, Madrid, January 12–16, 2015.
- 2014 Colloquium, Duke University, December 2014
- 2014 Institute for Computational and Experimental Research in Mathematics, Providence, RI, October 2014
- 2014 Colloquium, UC Berkeley, September 2014
- 2014 Invited address at the AMS meeting at the University of Wisconsin, Eau Claire, September 2014
- 2014 “Harmonic Analysis and Partial Differential Equations - Recent Developments and Future directions”, a conference in honor of Carlos Kenig, The University of Chicago, September 2014.
- 2014 Conference “Perspectives of Modern Complex Analysis”, the Banach Center conference place in Bedlewo, Poland, June 2014
- 2014 Conference “Recent advances in non-local and non-linear analysis: theory and applications”, Zurich, Switzerland, June 2014
- 2014 Trimester Program on Harmonic Analysis and Partial Differential Equations, “Introductory Workshop: Topics in Harmonic Analysis and PDEs”, the Hausdorff Research Institute, Bonn, Germany, June-July 2014
- 2014 73rd Midwest PDE Seminar, Northwestern University, May 10-11, 2014
- 2014 University of California – Santa Barbara, Colloquium, April 2014
- 2014 University of California – Santa Barbara, Applied Mathematics and PDE Seminar, April 2014

- 2014 Purdue University, Special Seminar, April 2014
- 2014 13th New Mexico Analysis Seminar, An afternoon in Honor of Cora Sadosky, Albuquerque, NM, April 2014
- 2014 Western Spring Sectional Meeting, Special Session on Harmonic Analysis and Operator Theory, Albuquerque, NM, April 2014
- 2014 University of Chicago, Calderón-Zygmund Analysis Seminar, January 2014
- 2014 2014 Joint Mathematics Meetings, Baltimore, AMS Special Session “Fractal Geometry: Mathematics of Fractals and Related Topics”, January 2014
- 2013 Mathematics and Mechanics in the Physical Sciences: A Tribute to James Serrin, November 2013.
- 2013 University of California – Santa Barbara, Materials Department Seminar, August 2013
- 2013 University of Minnesota, PDE Seminar, September 2013
- 2013 Fluid Mechanics and Singular Integrals, Seville, Spain, June 2013
- 2013 Research Term on Real Harmonic Analysis and Applications to PDE Madrid, June 2013
- 2013 University of Minnesota, Introduction to Research seminar, April 2013.
- 2013 Stanford University, Colloquium, March 2013.
- 2013 Stanford University, Analysis & PDE seminar, March 2013.
- 2013 Career Options for Women in Mathematical Sciences, The Institute for Mathematics and its Applications, March 2013.
- 2013 University of Wisconsin, Colloquium, February 2013.
- 2013 Stanford University, Analysis seminar, February 2013.
- 2012 Charles University, Prague, December 2012, *Hardy spaces and elliptic operators with non-smooth coefficients*
- 2012 Institut de mathematiques de Toulouse, Toulouse, France, November 2012, *Elliptic PDEs in rough media*
- 2012 Université Paris-Sud 11, Orsay, France, November 2012, *Analysis of higher order elliptic operators*
- 2012 International Workshop on Operator Theory and Applications, University of New South Wales, Sydney, Australia, July 2012, *Elliptic PDEs in rough media*
- 2012 School of Mathematical Sciences, Beijing Normal University, Beijing, China, June 2012, *Generalized Hardy, BMO, and Hölder spaces*
- 2012 School of Mathematical Sciences, Beijing Normal University, Beijing, China, June 2012, *Boundary value problems for second order elliptic operators with rough coefficients*
- 2012 School of Mathematical Sciences, Beijing Normal University, Beijing, China, June 2012, *Higher order elliptic boundary problems*
- 2012 School of Mathematical Sciences, Beijing Normal University, Beijing, China, June 2012, *Elliptic PDEs in rough media*
- 2012 The Arkansas Spring Lecture Series, Plenary Talk, Fayetteville, AR, March 2012, *Singular integrals, perturbation problems, boundary regularity, and harmonic measure for elliptic PDEs in rough media*
- 2012 Université Paris-Sud 11, Paris, March 2012, *Well-posedness in L^p for elliptic boundary value problems*
- 2012 The 28th annual Southeastern Analysis Meeting, Plenary Talk, University of Alabama in Tuscaloosa, Alabama, March 2012, *Elliptic PDEs, analysis, and potential theory in irregular media*
- 2012 The 28th annual Southeastern Analysis Meeting, Plenary talk, University of Alabama in Tuscaloosa, Alabama, March 2012, *Elliptic PDEs, analysis, and potential theory in irregular media*
- 2012 University of Minnesota, Colloquium, March 2012, *Elliptic PDEs, analysis, and potential theory in irregular media*
- 2011 Universitat Autònoma de Barcelona, Barcelona, Spain, December 2011, *Analysis and potential theory for higher order PDEs in the domains of rough geometry.*
- 2011 ICREA Conference on Approximation Theory and Fourier Analysis, Barcelona, Spain, December 2011, *Elliptic PDEs with rough coefficients.*
- 2011 AIM Workshop “Weighted singular integral operators and non-homogenous harmonic analysis”, Palo Alto, CA, USA, October 2011, *Riesz transforms and rectifiability.*

- 2011 International conference “Harmonic Analysis and Approximations, V” dedicated to 75th anniversary of academician Norair Arakelian, Armenia, September 2011, *Harmonic analysis and potential theory for higher order elliptic boundary problems*.
- 2011 “Complex analysis and its applications” International Conference dedicated to the 70th anniversary of A.F.Grishin, Kharkiv, Ukraine, August 2011, *Potential theory, analysis and elliptic boundary problems in rough domains*.
- 2011 International Workshop on Operator Theory and its Applications, Seville, Spain, July 2011, *Elliptic boundary problems with rough coefficients*.
- 2011 Ecole Normale Supérieure de Cachan, Paris, France, June 2011, *The hidden landscape of localization*.
- 2011 Ecole Polytechnique, Paris, France, June 2011, *The hidden landscape of localization*.
- 2011 University of Minnesota, Minneapolis, MN, April 2011, *Analysis of partial differential equations in non-smooth media*.
