MATH 8802, Spring 2020, MWF 1:25-2:15, Vincent Hall 209

Instructor: Jiaping Wang; Vincent Hall 223, (612) 624-3829, wangx208@umn.edu

Office hours: MWF 3:35-4:25 (subject to change)

Course title and a brief description: Functional Analysis

This is the second semester of one-year long course on functional analysis at the graduate level. We plan to follow the textbook closely and cover most of the material on Banach algebras and spectral theory for self-adjoint operators on Hilbert spaces.

Assignments: Homework will be assigned regularly and posted on the web page www.math.umn.edu/~jiaping.

Exams: No exams are scheduled.

Grading scheme: The final grade is based on homework completion.
